

You shall secure intelligence way before others.
This supremacy shall make you unbeatable.

DIGITALBLIZ.COM

Exchanges Cross Explorer

We created something that was not existent before: the capability to control intelligence on cryptocurrency markets way before others.

We have the most complete and fast data gathering available.

The essential tool-kit for any wise decision on crypto-markets.

Our Mission

To be the most prominent and reliable data provider
on the cryptocurrency market

How it works

The platform is based on proprietary algorithms.

- Establishes a dynamic and reliable Exchanges Rank List, based on predetermined specifications, being fair and impartial, and performed through real-time analysis of highly specific parameters (coin prices, fluctuation, exchange trade volumes, aggregates, and more).
- Provides a real time average value for the monitored cryptocurrencies (DigitalBliz Single Coin Index) and relevant values on different Exchanges, determined by weighting all transactions of a specific cryptocurrency on each Exchange monitored and updated every 15 seconds.
- Provides a continuously updated unique DigitalBliz Deep4 crypto-index, based on pre-determined specifications, meant to be fair and impartial.
- Provides reliable Data Gathering of non-fungible Security Tokens, displayed on a dedicated dashboard, offering a complete set of features.

Features

- a.** Cryptocurrencies performance analysis on main and validated markets, backed by reliable and accurate proprietary algorithms.
- b.** Cryptocurrencies Indexes refreshed and updated on a 15 second basis, and based on a weighted average of ranked exchanges (real buying and selling values).
- c.** Real-time cross function and exchange rate between over 50 Coins and the ranked Exchanges list.
- d.** Chance to add Coins and Exchanges.
- e.** Analytics processing and rigorous Flash Forecasts backed by:
 - Data Gathering & Machine learning
 - Sentiment analysis: On-time scrutiny of opinions, advices and estimates done by crypto currency experts on specific social groups, distinct networks and peer to peer, with dedicated algorithms linking unique key words.
- f.** Totally customizable dashboard and data display.
- g.** Complete integration with customers' systems.
- h.** Saved historical data are provided in a completely customizable panel for benchmark activities and analytics.
- i.** Smart Market Alerts help you to monitor your financial index strategy.
- j.** Deep4 Alghorithm defines an interactive financial index

Smart Market Alert

Select and monitor your financial Index Strategy.

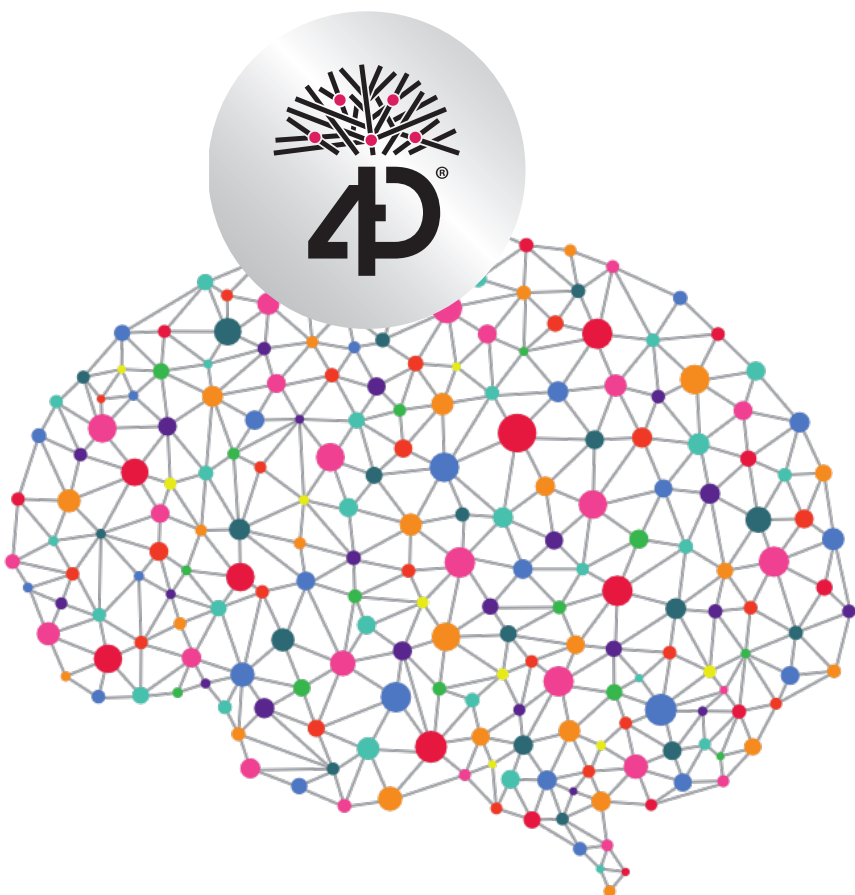

Proprietary widget that allows you to select and **add custom indices** on specific coins and activate an **Alert System** that alerts the user when a precise event is taking place on a selected Exchange or marketplace.

Smart Market Alert (SMA)				
Date	Coin	Price	Select Index	
18/10/2018 11:44:01	BTC	6575.19	Golden Cross	
18/10/2018 11:44:16	ETH	206.65	MACD	
18/10/2018 11:54:01	XRP	0.473435	RSI	
-	BCH	-	Bollinger Bands	
18/10/2018 11:59:01	EOS	5.5587	Sell	W
18/10/2018	XLM	0.250156	Sell	W

Smart Market Alert (SMA)				
Date	Coin	Price	Alert	Chart
18/10/2018 11:42:01	BTC	6574.42	Buy	W
18/10/2018 11:41:46	ETH	206.675	Buy	W
18/10/2018 11:52:31	XRP	0.473239	Buy	W
18/10/2018 11:57:46	BCH	452.006	Buy	W
18/10/2018 11:56:30	EOS	5.559	Sell	W
18/10/2018	XLM	0.25018	Sell	W

- Select the Index from the list or add your custom one.
- Alert in real-time on the major Coin/ Exchanges available on the market.
- Observe and analyse the Index Event, on a specific timestamp, in detail.

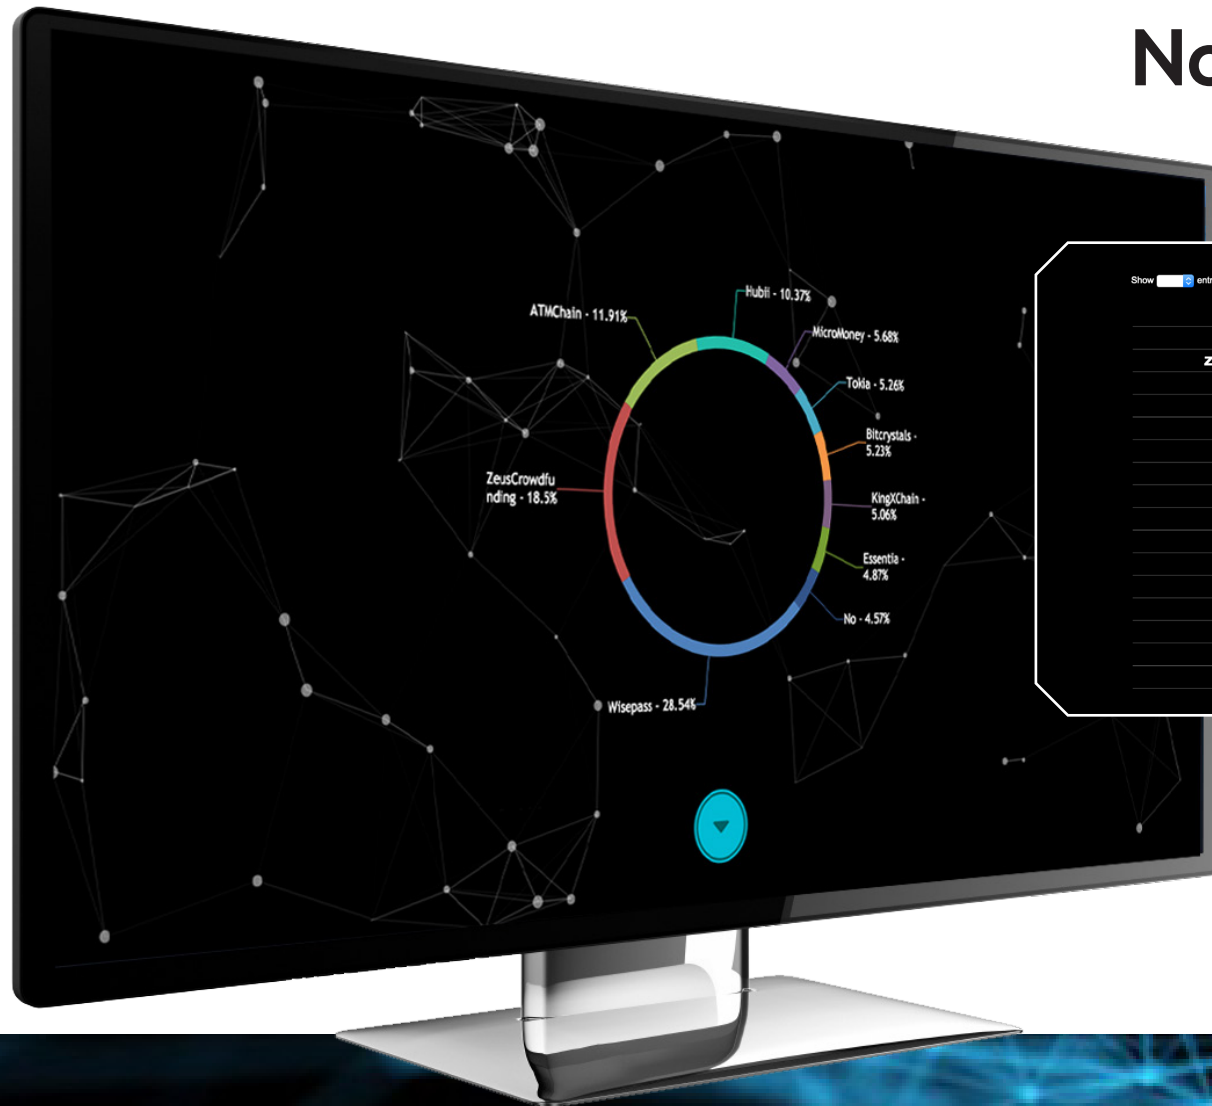

Deep4 Alghorithm

- Analyzing all trading history recovered every 15 seconds by our data gathering, **the neural Deep4 Algorithm** is able to create a financial index on a diversified panel of cryptocurrencies according to the profile of each coin on each exchange.
- **The Deep4 Alghoritm defines an interactive financial index able to create a dynamic panel of coins, with high and low volatility, and stabilizing volatility risks and by automatically switching between the selected coins in a medium/long term strategy.**
