Mr. Andrea Tortorella
President of the Board Consulcesi Tech SA
Via Giuseppe Motta n.6
6828 Balerna, Switzerland

Dear Mr. Tortorella,

On behalf of the Ministry of Economy and Infrastructure of the Republic of Moldova I would like to present our compliments to the Consulcesi Tech SA and to inform you as follows.

Nowadays, the Moldovan Government recognises the most recent innovations in the IT and Financial Sector as important steps towards the future of the Republic of Moldova. Moreover, the Ministry is promoting a new national initiative in the form of Legislative Adjustment for the IT sector and opening of the first Innovation Technology Park in Moldova.

The main goal of the declared objective of the Legislative Adjustment is to contribute to the growth and innovation of the country, favouring the convergence of managerial competences and technological infrastructures, increase the competitiveness of the country, protect and support innovations and thereby increase the attractiveness for national and international investors.

Innovative technologies such as block-chain can create value in many sectors including finance, energy, healthcare and education. To boost the Innovation Technology Park we will need a strong and competitive environment, based on a clear and transparent regulatory framework for start-ups in the financial services that is dedicated to create a competitive and secure environment attractive for national and international investors.

Considering the above mentioned, as well as recognizing your knowledge and experience in this area, would like to present our invitation to the management of Consulcesi Tech SA to join the efforts of the Ministry of Economy and Infrastructure to create the conditions necessary for the development of the Innovation Technology sector, with a particular focus on the new block-chain technology.

A joint working group will be established in Chisinau in spring with the task to define a road map for the promotion of Moldova as a major international player in the development and implementation of innovation technologies.

Looking forward to our fruitful cooperation!

Sincerely yours,

**Minister of Economy and Infrastructure
of the Republic of Moldova**

Chiril GABURICI
